

EPO Scenarios on the future of intellectual property and patenting.

As far as papers go, should any of your students want access, the project is downloadable at: <http://www.epo.org/topics/patent-system/scenarios-for-the-future.html>

They will be able to obtain both the compendium, the hundred-plus interviews that were conducted as part of the project as well as the feedback that the project has generated.

The interviews formed the building blocks for the project and include leading figures such as:

- Francis Gurry, now DG of World Intellectual Property Organisation (WIPO),
- Kenneth Cukier, Technology Correspondent, The Economist
- Jens Fenstad, Chairman, World Commission on Ethics of Scientific Knowledge and Technology (COMEST)
- Tom Murray, President The Hastings Center; Former Commissioner, National Bioethics Advisory Commission
- Marshall Phelps, Corporate Vice President and Deputy General Counsel for Intellectual Property, Microsoft Corporation,
- Jeremy Webb, Editor, New Scientist, and many others
